DETAILED ACTION

Election/Restrictions

- 1.1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10, drawn to method for accommodating electronic component on a multilayer signal routing device, classified in class 29, subclass 825.
 - II. Claim 11-15 drawn to a multilayer signal routing device, classified in class 174, subclass 262.

The inventions are distinct, each from the other because of the following reasons:

1.2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process can be used to make other and materially different product. This process can be used to make a multilayer signal routing device without electrically conductive micro-vias.

1.3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

1.4. A telephone call was made to Mr. Thomas E. Anderson (Regis. No. 37,063) on November 9, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

1.5. Upon indication of allowable subject matter, any claim containing such subject matter will be rejoined and allowed.

1.6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

2.1. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yuriy Semenenko whose telephone number is (571) 272-6106. The examiner can normally be reached on 8:30am - 5:00pm.

Art Unit: 2841
